

Interest Application to Work with Dr. Forbey

Email me a one (1) page statement on what and why you are interested in working on in our lab.

Here are the things to include in your paragraph:

1. State the question or questions that you are most interested in pursuing in our lab?
2. Explain how you might go about answering the question(s) you pose above:
 - a. what types of comparisons would you make
 - b. what equipment you might need
 - c. what techniques you might need to learn
 - d. what animals or plants that you may need and in what quantity.
3. Explain why this question is interesting to you
4. Describe any experience you may have that makes you qualified to pursue research in my lab. In other words, why would our lab be better with you in it? This does not need to be restricted to scientific or academic experience. You could include experiences you have had that illustrate quality characteristics like attention to detail, hard working, creative, good in the field, ability to troubleshoot problems, team player, etc.

There are no wrong answers or statements. I just want to know that you have thought about why you think working in our lab is interesting, how working in our lab would benefit you and how you could benefit the lab.

Please also include your name and contact information in your statement.
