OBJECTIVES:

Students work with Laboratory staff on independent research projects in the mentor's field of expertise specifically in the areas of: Cancer Biology; Neuroscience; Plant Biology; Cellular and Molecular Biology; Genetics; Macromolecular Structure; and Bioinformatics. The fundamental objective of the URP program is to give students an opportunity to conduct first-rate research. Participants learn about scientific reasoning, laboratory methods, theoretical principles, and scientific communication. The specific objectives of the URP program are to: give college undergraduates a taste of original research at the cutting edge of the biological sciences; encourage awareness of the physical and intellectual tools necessary for biological research; foster an awareness of the major problem areas currently under investigation in the biomedical and life sciences; and promote interactions with laboratory scientists through an immersion in the research environment.

ELIGIBILITY

Any matriculated college sophomore or junior with a strong academic background may apply. The program includes young men and women from around the world and is open to all legitimate applicants irrespective of gender, race, ethnic origin, or creed.

FUNDING

URP students will receive a stipend of \$4,000 for their participation in the program. All room and board expenses are covered by the Program.
