

1098T Supplemental Information – PLEASE READ CAREFULLY

Boise State University is required to report either total payments received or amounts billed for eligible students paying qualified tuition and related expenses in the calendar year 2007. Your 1098T form reflects **amounts billed** which were posted to the student account between the dates of January 1, 2007 and December 31, 2007 (Box #2) and **does not reflect paid amounts**. In addition, we are required by the IRS to report scholarships or grants that were awarded for the student's cost of attendance during the calendar year (Box #5). The IRS also requires us to report reductions made during calendar year 2007 that relate to amounts reported for a prior calendar year. These reductions appear in Box #4 for amounts billed and in Box #6 for scholarships or grants.

Please note Box #2 (total amounts billed for 2007) and Box #4 (reductions to prior year amounts billed) reflect each transaction for the year 2007. So if you added and dropped Spring 2007 classes and it caused fees to adjust, each separate transaction could potentially be reflected in these boxes.

Please note: The eligibility of billed amounts in the calculation of a tax credit is dependent on a variety of factors particular to each individual. Please refer to IRS publication 970 in consultation with a tax professional to determine the eligibility of the amounts shown. Boise State University is happy to help you obtain the information you need for the Hope and Learning credits, but is unable to provide any tax consultation or advice.
