

FACULTY and STAFF FLOWCHART

FACULTY AND STAFF SHOULD TAKE EXTRA PRECAUTION when traveling during the COVID pandemic. These precautions include: physical distancing, wearing facial coverings in public and elsewhere when appropriate, and frequent hand washing.

In addition, those who are traveling by air or public transportation and intend to be on campus within 14 days of returning will need to complete the Travel During COVID-19 Form prior to travel.

In order to ensure everyone's health and safety, as well as maintain the health and safety of the Boise State campus community, here is an algorithm to help you determine if you should quarantine before returning to campus for work.

AS A REMINDER, any Boise State employee who works on campus and is exhibiting symptoms, or who has come in contact with a COVID-positive individual, should contact the public health office to request a consultation.

If you have questions or a situation not addressed above, please contact the public health office at:
publichealth@boisestate.edu or (208) 426-2968
