Q31. Please tell me whether you agree or disagree with the following statement: Too often public policy debates in Idaho are all or nothing conversations with one side saying we have to protect the environment and the other saying we have to grow the economy. The truth is, this is a false choice. Idaho can have economic development while still protecting the environment.

Q32B. Currently, the federal government owns or manages over 60% of land in Idaho. Transferring management of those lands to the state government in Idaho could potentially cost the state millions per year in taxpayer dollars. Knowing this, would you favor or oppose transferring land owned by the federal government to the state government for management?
