

Graduate Teaching Assistantship in Mechanical Engineering
2021-2022
Job Announcement

Job Description: The Mechanical and Biomedical Engineering (MBE) department is hiring a Graduate Teaching Assistant for ME 310 (Experimental Methods Lab) or ME 273 (Introduction to Computation for Engineers). Duties may include supervising student work in the lab, giving tutoring sessions, maintaining lab equipment, troubleshooting code (Matlab), grading lab reports, and grading homework. Typically, the hired student will be a teaching assistant for one class in either the fall or spring, although this depends on the needs of the department.

Time Period: This position is available for the 2020-2021 academic year, Aug. 2021 – Aug. 2022. The position can be renewed for an additional year based on satisfactory performance.

Salary: This position has an annual stipend of \$24,000 with a full tuition and fee waiver.

Application Process: All applicants must have either been accepted into the MBE graduate program or be in the process of having their application package reviewed. Interested applicants should complete the *online application form* found on [this page](#).

Prospective Thesis Advisors: Preference will be given to applicants that are pursuing a thesis-based Master of Science degree. Although not required, it is recommended that applicants contact MBE faculty to discuss potential thesis projects (see www.boisestate.edu/coen-mbe/research/).

Application Deadline: Applications should be received by *Thursday, April 15th*. However, further applications will be considered until the position has been filled.
